AI-Assisted Medical Evaluation Report

Report ID: 20260912064434.9E1E1A

Report Date: 12/09/2026

Report Type: DENGUE Evaluation

Model Version: v1.0

1. Patient Information

Patient Name	Ashish Gupta	Patient ID	USER-1
Age	22	Sex	Male
Contact	976876876876	Evaluation Date	12/09/2026 06:44
Address	b aliya kothi		

2. DENGUE Evaluation Inputs

Parameter	Patient Input	Unit / Type
Age	22	years
Haemoglobin	14.0	g/dL
WBC Count	2399.99	cells/ μ L
RBC PANEL	1.0	Input
Platelet Count	145000.0	cells/ μ L
Sex_Female	False	True / False
Sex_Male	True	True / False

3. Disease Analysis

DENGUE

AI PREDICTION: YES

Model Confidence: _____%

4. Result Interpretation

YES	The model predicts the condition based on supplied input data. This is not a confirmed diagnosis.
NO	The model does not predict the condition from supplied input data. A negative prediction does not rule out illness.

5. Precautions & Recommendations

- Consult a qualified healthcare professional if the AI prediction is YES.
- Maintain adequate fluids unless a clinician has advised otherwise.
- Monitor symptoms and laboratory values as advised by a healthcare professional.
- Do not self-medicate; ask a healthcare professional which medicines are appropriate.

Dengue assessment may require clinical examination and appropriate laboratory testing; an AI prediction is not confirmation.

6. AI Model Information

System	HEAL-AS
Evaluation Method	Machine-learning based screening / prediction
Input	Patient-provided clinical and laboratory information
Output	Disease prediction: YES / NO
Model Version	v1.0

7. Medical Disclaimer

Important: HEAL-AS is an AI-assisted health evaluation system. Results are for informational and screening purposes only and are not a confirmed medical diagnosis. A qualified healthcare professional should consider symptoms, history, examination, and appropriate diagnostic tests. If the prediction is **YES**, please visit a qualified doctor for further evaluation. Do not start, stop, or change medication solely on the basis of this report.
