Health Care Evaluation and Analysis Autonomous System

AI-Assisted Medical Evaluation Report

Report ID: 20260912071003_9A8CE3Report Date: 12/09/2026

Report Type: DIABETES EvaluationModel Version: v1.0

1. Patient Information

Patient Name	Ashish Gupta	Patient ID	USER-1
Age	17	Sex	Male
Contact	976876876876	Evaluation Date	12/09/2026 07:10
Address	b aliya kothi		

2. DIABETES Evaluation Inputs

Parameter	Patient Input	Unit / Type
Age	17	years
BMI	18.0	kg/m2
Blood Glucose	150.0	mg/dL
Gender_Male	True	True / False
Gender_Other	False	True / False

3. Disease Analysis

DIABETES

AI PREDICTION: NO

Model Confidence: 100.00%

4. Result Interpretation

YES	The model predicts the condition based on supplied input data. This is not a confirmed diagnosis.
NO	The model does not predict the condition from supplied input data. A negative prediction does not rule out illness.

5. Precautions & Recommendations

- Consult a qualified healthcare professional if the AI prediction is YES.
- Follow an individualized diet, activity, and monitoring plan from a healthcare professional.
- Do not change insulin or other medicines based only on this AI report.
- Seek medical advice for persistently abnormal glucose readings or concerning symptoms.

Diabetes status is normally established using appropriate laboratory testing and clinical assessment.

6. AI Model Information

System	HEAL-AS
Evaluation Method	Machine-learning based screening / prediction
Input	Patient-provided clinical and laboratory information
Output	Disease prediction: YES / NO
Model Version	v1.0

7. Medical Disclaimer

Important: HEAL-AS is an AI-assisted health evaluation system. Results are for informational and screening purposes only and are not a confirmed medical diagnosis. A qualified healthcare professional should consider symptoms, history, examination, and appropriate diagnostic tests. If the prediction is **YES**, please visit a qualified doctor for further evaluation. Do not start, stop, or change medication solely on the basis of this report.
